Helping Australia Grow

BFA Certified Organic Product

Organix Weed Blitz is a BFA certified product. With registration as an Australian Organic Registered Garden Product this provides confidence for the end user, knowing that this product has been produced and manufactured in-line with the strict standards set by the Australian Government, approving its use in an organic production setting.

Broad Spectrum Weed Control

Organix Weed Blitz controls over 3000 species, including plants that have developed resistance to synthetic herbicides. It has also been extensively used for its knockdown action in the control of noxious weed such as blackberry, patterson's curse, thistles and other invasive weeds. It also provides pre-emergent weed control, targeting weed seed populations in the soil and greatly reducing emerging weed pressure.

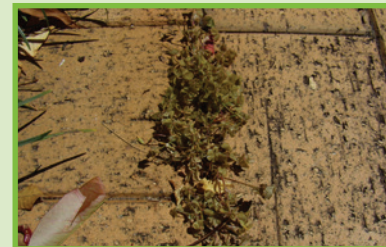

Environmentally Safe

Organix Weed Blitz will immediately improve weed control programs environmental impact. It has a neutral pH, zero

residue, breaking down into a naturally occurring oxide within 72 hours. It has no effect on birds, bees, microbial and earthworm populations. When incorporated into maintenance programs it will immediately begin to improve your soil health and alleviate soil residues.
